

Ramon de Punder, PhD

r.f.a.depunder@uva.nl ◇ ramondepunder.com

WORK EXPERIENCE

- 2021– **Co-Founder and Director**, SlimBieden | 50% ownership | ~30 hours/week
Built a Dutch housing-price platform with the market's only fully distributional forecast and highest precision among publicly reported benchmarks. Sold 1,800 reports since commercial launch in 2024; partnered with 12 businesses. Lead a four-person model team and co-develop Python pipelines for core models and automated reports; launched SlimBieden Research for joint research projects.
- 2023– **Postdoctoral Researcher**, University of Amsterdam | Section: Quantitative Economics
Develop PhD research into publications and follow-up projects; study distributional flood-risk pricing with an insurer in the Dutch housing market, including stakeholder and media communication.
- 2015–2026 **Co-Founder and Director**, dPT Wiskunde & Fibonacci Studiebegeleiding (FBSB) | 50% ownership
Scaled two educational ventures to over 100 teachers in five Dutch cities; won an innovation award with free office space and gained national TV coverage. Acquired by StudieHub in August 2026.
- 2016–2020 **Teaching Assistant**, Tinbergen Institute, University of Amsterdam & Cambridge Education Group
Advanced Econometrics; Programming & Numerical Analysis; Probability Theory & Statistics; Econometrics; Time Series Analysis; Bachelor's Thesis Seminar in Econometrics; Mathematics.

EDUCATION

- 2021–2026 **PhD in Econometrics**, University of Amsterdam. Thesis: “Local Divergences” (papers [1]–[3])
Main contributions: (i) Developed censored distributional-forecast evaluation with formal power guarantees; censoring more than doubles one-day model discrimination for the S&P 500, with gains confirmed for bivariate ETF forecasts. (ii) Derived Adam-like adaptive learning rates and characterized divergence-reducing updates for online stochastic-gradient time-series models, including ARMA-GARCH, while showing that some broader specifications need not move toward the truth.
- 2017–2021 **MSc in Econometrics, Finance and Economics (Research)**, Tinbergen Institute
- 2018–2019 **MSc in Actuarial Science and Mathematical Finance**, University of Amsterdam
- 2017–2018 **MSc in Econometrics**, University of Amsterdam

PUBLICATIONS AND WORKING PAPERS

- [1] **De Punder, R.**, Diks, C., Laeven, R., and van Dijk, D. (2026). “Localizing Strictly Proper Scoring Rules.” *Journal of the American Statistical Association*, 121(554), 1447–1459. Coverage: TI, UvA, and a radio interview.
- [2] **De Punder, R.**, Dimitriadis, T., and Lange, R. (2026). “Expected Kullback-Leibler-based Characterizations of Score-Driven Updates.” *Tinbergen Discussion Paper*, 24-051/III. R&R at JASA.
- [3] **De Punder, R.** (2026). “Proper and Robust Autoregressive Derivative Adaptive Models.” *Tinbergen Discussion Paper*, 26-022/III.
- [4] Vrugt, J., Diks, C., **de Punder, R.**, and Grünwald, P. (2025). “A Sandwich with Water: Bayesian and Frequentist Inference Under Model Misspecification.” *ARC Geophysical Research*, 1, Article 16.
Contribution: Robust sandwich Bayesian inference under model misspecification; on streamflow data, robust parameter variance estimates are one order of magnitude larger on average than conventional estimates.
- [5] **De Punder, R.**, Dijkstra, M., and Diks, C. (2026). “Barron-Loss Adaptive Estimation.” *Tinbergen Discussion Paper*, 26-023/III.
Contribution: A robust filter and its estimation theory for financial returns; on Bitcoin data, this filter outperforms leading benchmarks in joint VaR/ES and log-score comparisons at the 10% significance level.
- [6] **De Punder, R.**, and Dijkstra, M. (2026). “Copying Transaction Prices: How Dutch Housing Appraisals Track Idiosyncratic Variation.” *Tinbergen Discussion Paper*, 26-086/II.
Contribution: Developed a Monte Carlo test of appraisal independence; regressions show about 80% pass-through of idiosyncratic price deviations, raising collateral risk and motivating independent statistical valuations.
- Other projects:* “Adaptive Score-Driven Filters”, “Composite Scores”, “Focused M -Estimation”, “Flood Tail Risk and Probability Weighting”, “A Functional Perspective on Localization”, and “Relative Scoring Rules”.

AFFILIATIONS

- 2026– **Tinbergen Institute** | Candidate Fellow
- 2025– **Amsterdam Center of Excellence in Risk, Resilience and Regulation** | Affiliated Research Fellow
- 2024– **Research Centre for Sustainable Investments and Insurance** | Research Fellow
- 2021– **Center for Nonlinear Dynamics in Economics and Finance** | Research Fellow

TECHNICAL SKILLS

- | | |
|------------------------------|--------------------|
| Programming Languages | Python, R, MATLAB |
| Tools | Claude Code, Codex |
